Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- choose appropriate technology to support the organisation's activities
- identify suitable training options to support introduction of new technology
- develop strategies to ensure technology is used effectively within the organisation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain basic principles of cost-benefit analysis
- describe cultural context in which Aboriginal and Torres Strait Islander boards operate, and how that may impact selection and use of technology
- identify equipment and funding sources
- describe geographic, social, economic and political contexts in which particular organisations operate and how these may impact selection and use of technology
- list potential barriers to learning, and strategies to address these
- list relevant provisions of federal, state or territory legislation and funding body requirements that may impact purchase, use and disposal of assets
- describe range of technology options available to support organisational activities
- outline relevant protocols and cultural responsibilities when supporting members of staff
- identify strategies to evaluate the use of information technology
- describe training options available to the organisation to develop skills in use of technology.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the regulation, licensing and risk – ATSI governance field of work and include access to:

- participation on an actual or simulated board
- examples of technology used in workplaces.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBCON601 Develop and maintain business continuity plans

Modification History

Release	Comments
Release 2	This version first released with BSB Business Services Training Package Version 1.1. Version created to correct mapping table information
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to work within the business continuity framework to develop and implement business continuity plans for an organisation to manage risk and ensure business resilience when faced with a disruptive event.

It applies to individuals working in positions of authority who are approved to implement change across the division, business area, program area or project area.

This unit addresses the knowledge and processes necessary to develop and maintain business continuity requirements. Business continuity awareness and planning help the organisation to identify barriers and/or interruptions and determine how the organisation will achieve critical business objectives (even at diminished capacity) until full functionality is restored.

The focus is on risk and vulnerability assessment, business impact assessments, and business continuity and communication plans.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- develop plans to meet customer service requirements using effective management and consultation strategies
- monitor service performance and demonstrate proficiency in resolution of complaints and continuous improvement of customer service delivery in accordance with organisational policies and procedures.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe multicentre service requirements
- describe principles and techniques involved in management and resolution of customer complaints
- explain quality customer service delivery
- outline record-keeping and management methods
- explain strategies for monitoring, managing and introducing ways to improve customer service relationships

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the stakeholder relations – customer engagement field of work. This includes access to:

- appropriate documentation and resources normally used in a multicentre
- customer feedback.

Assessors must satisfy NVR/AQTF assessor requirements.

Assessment Requirements for BSBCUE601 Optimise customer engagement operations

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- monitor and optimise customer contact processes
- analyse customer contact processes using statistical tools and graphical techniques
- investigate reasons for performance outside of control limits and impediments to productivity
- conduct a qualitative and quantitative analysis against the organisational standards
- review, trial and modify processes
- benchmark the operations including researching and documenting best practice processes, performing a risk/benefit analysis on possible approaches, implementing the improvements and documenting new performance indicators
- analyse statistical reports of contact centre process performance, explaining or demonstrating process improvement strategies and productivity improvement methodology
- analyse records of customer contact productivity measures, demonstrating knowledge of quality management and related process control methods.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe one complete suite of statistical control systems
- explain benchmarking principles
- identify customer contact processes and the range of channels available
- describe customer service principles and processes
- identify operating variables within customer contact operations

- explain principles of statistics, statistical process control and underpinning statistical calculations
- identify process review and documentation principles
- explain project management principles
- explain quality management and related process control methods.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the stakeholder relations – customer engagement field of work and include access to:

- information, reporting and databases for analysis activities
- relevant standards and guidelines
- benchmarking analysis and improvement plans
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

Assessment Requirements for BSBCUE603 Design and launch new customer engagement facilities

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- design and establish or substantially enhance a customer engagement facility including
 - researching the requirements based on the business needs
 - developing detailed specifications by delegating to and managing specialists
 - managing the physical and human resources
- consult with stakeholders throughout the development process to confirm the requirements and specifications, report concerns and review and debrief
- prepare a viable project management plan and use project management tools for the development, testing and launch of the facility
- develop testing procedures and plans for all resources
- plan follow-up actions after the launch.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify legislative, regulatory and organisational requirements for customer engagement facilities
- outline principles underpinning contact centre design at both the technology level and the human level with reference to:
 - emerging technologies
 - ergonomics of office design
 - hardware and telecommunications services
 - software systems
- identify sources of information, guidance and support for the project

- identify systems and physical resources used in customer contact facilities
- explain project management principles
- describe research methods using a range of information sources
- describe risk management principles and practices.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the customer engagement field of work and include access to:

- relevant legislation, regulations, standards and guidelines
- organisational business plans and policies
- specifications of resources used in customer engagement facilities
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

Assessment Requirements for BSBCUE604 Develop and maintain a service level strategy

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- develop, monitor and maintain a service level strategy and supporting policies and procedures
- analyse historical data to determine existing contact-wait and abandon-time characteristics
- formulate a comprehensive set of call-wait characteristics and targets based on the business needs and industry benchmarks
- consult with stakeholders to confirm requirements and verify the proposed service level strategy
- monitor and maintain service levels by collecting, analysing and acting on service level data
- develop a comprehensive contingency plan for loss of facilities or technology.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain benchmarking principles
- describe business and financial planning (budget) principles
- identify business requirements for service level performance, which may include regulatory requirements
- describe the technology functionality and reporting capability of a management information system to provide service-level contact data
- describe industry standards, best practice and regulatory requirements for service levels
- describe the difference and impacts of providing the required service-level against the industry standard

- explain the structure and organisation of workforce, including part-time, casual, contract and shift workers
- explain the organisational structure and who the key stakeholders are
- describe the processes for determining customer expectations and satisfaction with level of service.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the customer engagement field of work and include access to:

- information and databases for analysis activities
- industry and competitor benchmarking data
- historical contact-wait and abandon-time data

Assessment Requirements for BSBCUE605 Develop and maintain a customer engagement marketing strategy

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- apply marketing principles to customer engagement performance
- develop and maintain a marketing database system, including contingency planning
- develop customer service and retention strategies and integrate them into operating objectives and strategies
- communicate with stakeholders to promote the call centre, achieve consensus on sales and marketing principles, identify sales and services reporting criteria and report on performance and activity
- analyse and report on performance within a customer engagement environment.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify engagement centre information systems and the types of data and information available from these systems
- explain contingency-planning principles
- outline customer retention strategies and industry and marketplace/competitor marketing strategies
- describe information technology options and functionality within the customer engagement centre environment
- identify process review and documentation processes
- outline sales and marketing principles
- outline the use and development of databases.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the stakeholder relations – customer engagement field of work and include access to:

- information and databases for analysis activities
- relevant legislation, regulations, standards and guidelines
- stakeholder feedback and sales and customer activity results to analyse
- performance and target data
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

Modification History

Release	Comments
Release 1	This version first released with Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify the needs and priorities of the organisation in delivering services to customers
- diagnose problems in delivery of customer service
- respond to and report on customer feedback and complaints
- review client satisfaction using verifiable data
- consult and communicate effectively with relevant people
- develop and implement strategies and methods to improve customer service delivery including:
 - budgeting
 - promotion to staff
 - documentation and follow up.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the principles of customer service
- explain sources of information and techniques for identifying customer needs and reviewing customer satisfaction
- explain the organisational business structure, products and services related to customer service
- describe product and service standards and best practice models.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the customer service field of work and include access to:

- office equipment
- business technology
- organisational policies and procedures for customer service
- examples of customer complaints and feedback
- client satisfaction data
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBCUS402 Address customer needs

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to manage an ongoing relationship with a customer over a period of time. This includes helping customers articulate their needs and managing networks to ensure customer needs are addressed.

It applies to individuals who are expected to have detailed product knowledge in order to recommend customised solutions. In this role, individuals would be expected to apply organisational procedures and be aware of, and apply as appropriate, broader factors involving ethics, industry practice and relevant government policies and regulations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

BSBDES201 Follow a design process

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to follow a design process at a basic level, incorporating an element of problem solving to identify and resolve challenges that may hinder the process.

It applies to individuals who work under direct supervision and respond to specific issues or changes which may relate to product and service requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Clarify the challenge	1.1 Confirm the nature and scope of the challenge with stakeholders 1.2 Agree on specific objectives with stakeholders 1.3 Identify constraints that may impact the design process 1.4 Identify and source relevant supporting information and assistance
2 Explore different ideas	2.1 Generate a range of ideas to respond to the challenge

ELEMENT	PERFORMANCE CRITERIA
and solutions	2.2 Explore different options and ideas for meeting objectives 2.3 Involve others in the process of developing ideas and solutions
3 Select and present a solution	3.1 Reflect on different ideas and feedback, and select a preferred solution 3.2 Summarise the key ideas in the solution and present to stakeholders in appropriate format 3.3 Obtain any required approvals to take the solution to the next stage
4 Implement solution	4.1 Schedule key tasks and organise resources to support implementation 4.2 Carry out testing, prototyping or trialling of the proposed solution 4.3 Maintain any required documentation 4.4 Identify problems and seek advice and guidance from others
5 Evaluate solution	5.1 Check success of the solution based on original objectives 5.2 Seek feedback from appropriate stakeholders 5.3 Review both the solution and the process undertaken to develop the solution as part of an ongoing learning process

- investigate and explain consumer/end-user expectations
- explain current and emerging technologies and their effects on design in the industry
- identify influential designers, both past and present
- describe major design trends in the industry
- explain and describe the role of design in a given industry context.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the design process field of work and include access to:

- office equipment and resources
- sources of information on design in a specific industry context.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBDES301 Explore the use of colour

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to explore the use of colour and to apply colour theory.

It applies to individuals whose work involves understanding and applying the effective use of colour.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Design – Design Process

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Source information on colour and colour theory	1.1 Identify and access sources of information on colour and colour theory 1.2 Evaluate and collate information to build knowledge of colour and its application in different contexts
2 Experiment with colour	2.1 Test different colours and colour-combinations through experimentation 2.2 Use own ideas as a way of testing, challenging or confirming colour theory

ELEMENT	PERFORMANCE CRITERIA
	2.3 Ensure safe use of materials, tools and equipment during experimentation with colour
3 Communicate concepts and ideas through use of colour	<p>3.1 Investigate how colour might be used to communicate a particular idea or concept</p> <p>3.2 Select materials, tools and equipment relevant to the idea or concept</p> <p>3.3 Apply colour to communicate the concept or idea based on own knowledge of colour and colour theory</p> <p>3.4 Review and reflect on own use of colour and what it communicates</p> <p>3.5 Seek and obtain feedback from others about the way colour has been used and its success in communicating the concept or idea</p> <p>3.6 Present and store work any samples in a way which takes account of the need for professional presentation and potential relevance for future work</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- research information on colour and colour theory to inform work
- experiment with different colours and techniques to communicate a concept or idea
- review completed work and present and store samples for future reference.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain colour attributes and colour relationships
- describe and interpret different colour theories and their applications in different contexts
- describe individual interpretation and choice in relation to the use of colour, and the potential limitations of theory
- identify different materials, tools and equipment required to experiment with colour
- describe ways other practitioners use colour in their work.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the design process field of work and include access to:

- office equipment and resources
- materials, resources and equipment needed to apply colour in the relevant work context.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBDES401 Generate design solutions

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to generate design solutions in response to a particular design need.

It applies to individuals who generate concepts and solutions in response to a design challenge in any industry context. The starting point may be an open or closed brief; a spontaneous idea; modification of an existing product, service, process or system; or a point in an ongoing design process.

This unit builds on BSBDES201 Follow a design process, and places greater focus on research, concept generation and collaboration with others as key aspects of the design process.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Performance Evidence

Evidence of the ability to:

- develop and document a design solution through research, reflection, and generation and refinement of ideas
- demonstrate effective collaboration with others in the design process.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the elements and principles of design and their application in the relevant design context
- describe key features of the wider industry, and the economic, social and historical context design solutions are being generated in
- discuss design trends and technologies including other designs and the work of other design practitioners in the relevant industry context
- identify sources of information that support the development of technical and other knowledge
- describe the materials, tools, equipment, techniques and processes used in the generation of design solutions in the relevant industry context.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the design process field of work and include access to:

- interaction with others to reflect the collaborative nature of the design process

- sources of information on design for the relevant industry context.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBDES402 Interpret and respond to a design brief

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to interpret and creatively respond to a design brief through the production of work.

It applies to individuals working in any industry or design context where work is prescribed by a commissioning agent/client in a brief. Individuals are required to integrate the creative, communication and planning processes that support effective response to a design brief.

Work is carried out independently, although guidance is available if required.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Design – Design Process

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Interpret design brief	1.1 Correctly interpret the specifications of design brief 1.2 Establish and clarify user or client for the proposed product/service to inform design decisions 1.3 Identify and clarify specifications, parameters or constraints of design brief in consultation with relevant colleagues

ELEMENT	PERFORMANCE CRITERIA
	1.4 Source and evaluate information pertinent to design brief
2 Explore and develop design concept	2.1 Generate ideas for design concept through research, exploration and experimentation 2.2 Develop initial design concept consistent with design brief parameters 2.3 Evaluate and explore options for refining concept to best meet design brief parameters 2.4 Refine options and select approach which best meets design brief requirements
3 Liaise with client	3.1 Agree on communication process and frequency of communication with client 3.2 Present concepts for work at appropriate stages during design process as required 3.3 Present and explore different options and creative ideas with client when appropriate 3.4 Proactively seek and act on client feedback 3.5 Reach agreement on concept for work which complies with design brief
4 Plan production of work	4.1 Assess specific design production risks 4.2 Identify all components required to produce a prototype 4.3 Assess technical requirements for production against specified guidelines 4.4 Identify and consult with support services required for production 4.5 Produce a prototype and evaluate against design brief requirements 4.6 Analyse prototype and determine any further adjustments to production requirements 4.7 Finalise production specifications supported by accurate and complete documentation
5 Complete production of work	5.1 Collect and/or organise required components for the work 5.2 Produce or monitor the production of work ensuring all parameters of design brief are met 5.3 Accurately document work progress in a format appropriate to the nature of the design and requirements of design brief

ELEMENT	PERFORMANCE CRITERIA
	5.4 Seek client approval for work where appropriate

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- articulate and document the process of developing own design practice by learning to develop new skills, ideas and a unique voice
- adjust work processes via peer feedback and self-evaluation
- identify work options and incorporate networking in career development.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- list current and emerging designers in the relevant design discipline
- discuss current and emerging trends and technologies in the relevant design discipline, and the opportunities and challenges they represent
- identify professional development information and resources available to designers
- summarise sources of information relating to work opportunities and career planning.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the design process field of work and include access to materials, resources and equipment used in the development of technical and conceptual skills in the relevant design context.

BSBDES403 Develop and extend design skills and practice

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to develop and extend skills as a practising designer.

It applies to individuals who work as a designer, in any industry context, either independently or employed by an organisation.

Designers must continually refine, develop and evaluate their own conceptual and technical skills. Research, experimentation and collaboration are key factors in this process.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Design – Design Process

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Acquire and develop technical skills	1.1 Plan strategies to ensure the development of appropriate technical skills in design practice 1.2 Plan and use opportunities to develop and assess technical skills 1.3 Identify and use practice, feedback, discussion and evaluation

ELEMENT	PERFORMANCE CRITERIA
	<p>opportunities to continuously improve technical skills</p> <p>1.4 Develop and extend technical skills through testing capabilities of materials, tools and equipment</p> <p>1.5 Identify and use relevant media to stimulate technical and professional development</p>
2 Develop conceptual skills and ideas	<p>2.1 Engage in ongoing experimentation and exploration of different ideas and techniques</p> <p>2.2 Discuss ideas with others and apply knowledge gained to inform own work</p> <p>2.3 Use work practice to gain experience in a range of genres and interpretations</p> <p>2.4 Study the work of others to stimulate conceptual and technical skills development</p> <p>2.5 Research and share ideas across a range of design disciplines</p> <p>2.6 Identify and use a range of opportunities to develop own skills and keep informed about current design practice</p>
3 Develop own voice	<p>3.1 Explore and experiment with new ideas in making and/or interpreting design work</p> <p>3.2 Explore and use technology, where appropriate, to develop own voice and expand practice</p> <p>3.3 Demonstrate own voice through design project realisation implementation</p>
4 Evaluate own work	<p>4.1 Seek and apply constructive criticism from others to improve own work</p> <p>4.2 Evaluate own work against planned strategy for own practice</p> <p>4.3 Evaluate own work in the context of work by others to extend own practice</p> <p>4.4 Adjust work processes and practice as necessary to improve technical, conceptual and commercial outcomes</p>
5 Research work opportunities	<p>5.1 Correctly identify sources of information relating to work opportunities for designers</p> <p>5.2 Identify networks and promotional opportunities for designers which may be helpful in developing career opportunities</p> <p>5.3 Incorporate research results and information into own work and career planning</p>

BSBDES501 Implement design solutions

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to take a design concept or solution to the implementation stage. The outcome of work could be a completed product, object, system or service, but is more likely to be a complete or partial prototype or model for the design. The focus of the unit is on a general knowledge of design techniques and processes, and practical application to a specific design context.

It applies to individuals who implement concepts and solutions in response to a design challenge in any industry context.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Design – Design Process

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Organise resources for realising the design solution	1.1 Confirm the nature and scope of the proposed design solution 1.2 Research resources required for developing the design concept to implementation stage 1.3 Investigate different factors impacting the selection and use of resources 1.4 Select and prepare resources based on research and other

ELEMENT	PERFORMANCE CRITERIA
	legislative or organisational requirements
2 Test the design solution	2.1 Experiment with a range of different techniques and processes to test the design solution 2.2 Evaluate, challenge and refine testing processes 2.3 Gain input and feedback from key stakeholders during testing 2.4 Accurately document outcomes of testing 2.5 Select final design solution based on outcomes of testing and input from others
3 Develop prototype or model	3.1 Create prototype or model based on agreed approaches 3.2 Select and organise materials, tools and equipment, where appropriate, according to chosen design solution 3.3 Expose model or prototype to quality checks and ongoing analysis, enhancement and refinement 3.4 Compare completed prototype or model against identified needs and other considerations and make adjustments as required
4 Present prototype or model	4.1 Identify key stakeholders design should be presented to 4.2 Select appropriate format for presentation based on nature of audience and design 4.3 Present prototype or model to optimise clarity, conciseness and appeal

Performance Evidence

Evidence of the ability to:

- undertake critical analysis, testing and development of a model, prototype or aspect of a design solution to meet an identified need
- present model to key stakeholders using the most appropriate best practice methods.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the elements and principles of design and their application in relevant design context
- describe key features of the wider industry, with the economic, social and historical context for the design solution
- discuss design trends and technologies including other designs and the work of other design practitioners in the relevant context

BSBDES502 Establish, negotiate and refine a design brief

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to work proactively with a client or commissioning organisation to develop and negotiate a design brief.

It applies to individuals working in any industry or design context where the designer plays a key role in determining the scope and nature of work required. Establishment, negotiation and refinement of a design brief requires the integration of highly-developed creative thinking, communication and planning skills in a process that may not be linear. Adaptability and effective responses to change and new ideas are crucial.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Design – Design Process

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Establish design requirements	1.1 Identify and make appropriate contact with relevant stakeholders for the design project, in addition to the client 1.2 Identify and source information and references relevant to the design project 1.3 Undertake critical analysis of sources and extract key information to inform the design project

ELEMENT	PERFORMANCE CRITERIA
	<p>1.4 Liaise with client and other key stakeholders to determine overall objectives and parameters for the design project</p> <p>1.5 Proactively seek, review and act on information needed to inform constructive communication with client</p> <p>1.6 Build trust and respect between self and client through effective communication and demonstration of professional integrity</p>
2 Develop and refine design brief	<p>2.1 Develop concepts and ideas for inclusion in design brief, taking account of overall objectives and parameters</p> <p>2.2 Undertake own analysis of concept and challenge ideas and approaches taken to ensure responsiveness to project needs</p> <p>2.3 Present ideas in an appropriate format/medium and seek feedback from key stakeholders</p> <p>2.4 Use effective communication techniques to generate discussion, debate and critical analysis</p> <p>2.5 Re-evaluate and refine options based on own analysis and discourse with others</p> <p>2.6 Establish and agree on final nature and scope of design brief with client and accurately document details</p>
3 Negotiate terms and conditions	<p>3.1 Negotiate and agree terms and conditions of brief in accordance with relevant organisational and professional standards</p> <p>3.2 Clarify, agree and document roles and responsibilities of those involved in the project</p> <p>3.3 Confirm agreements in writing in accordance with organisational requirements</p> <p>3.4 Identify the need for specialist advice when developing formal agreements or contracts, and seek appropriate assistance</p>

Foundation Skills

BSBDES601 Manage design realisation

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to manage the process of taking a design from concept to final realisation or production. It has a strong focus on planning, implementation and monitoring skills, combined with a sound knowledge of design and production issues and challenges in a given context.

It applies to individuals working in any industry context or design discipline who take responsibility for turning design concept into reality – a product or service of value to the end-user. This person could be an individual designer-maker or a designer working as part of a larger design/production team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Design – Design Process

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Plan realisation of design	1.1 Collect, analyse and maintain relevant information on the design 1.2 Discuss and agree on standards of work and monitoring requirements with appropriate stakeholders 1.3 Develop clear plan and schedule for design realisation,

ELEMENT	PERFORMANCE CRITERIA
	including key roles and responsibilities linked to timelines and budget
2 Implement and monitor realisation of design	<p>2.1 Organise and/or allocate resources to achieve realisation of design within required standards, timeframes and budget</p> <p>2.2 Liaise with others involved in design realisation to ensure obligations and quality standards are met within time, budget and technical resources</p> <p>2.3 Maintain accurate, relevant and complete documentation in accordance with agreed standards</p> <p>2.4 Monitor process to ensure integrity of design is maintained at all times, including through the process of challenging and interrogating own design work</p> <p>2.5 Promptly identify difficulties or problems that arise in relation to realisation of design and take action to rectify situation</p>
3 Liaise and negotiate with stakeholders	<p>3.1 Establish and maintain appropriate communication channels with relevant stakeholders</p> <p>3.2 Proactively seek and provide information to facilitate effective design realisation</p> <p>3.3 Adhere to agreed terms and conditions or negotiate appropriate changes in light of changed circumstances</p> <p>3.4 Negotiate and agree on revisions with relevant parties in a professional manner, to enhance quality of outcome</p>
4 Complete design process	<p>4.1 Finalise design outcomes in accordance with terms and conditions</p> <p>4.2 Seek feedback from key stakeholders on finished design and make final adjustments as agreed</p> <p>4.3 Evaluate completed design in relation to own work and overall process, to inform future practice</p>

Assessment Requirements for BSBDES601 Manage design realisation

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- produce a design according to all brief requirements
- demonstrate highly-developed interpersonal and negotiation skills to deliver the finished product.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline key responsibilities of relevant personnel in this context
- describe best practices when dealing with setbacks in the production process
- explain production processes in a particular industry context or discipline including required materials, tools and equipment.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the design process field of work and include access to:

- resources, tools, materials and equipment required for realising a design in a specific context
- a design concept that the candidate can take to realisation stage
- other people to reflect the collaborative nature of the work.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBDES602 Research global design trends

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to research and critically evaluate global design trends. The focus is on research and analysis of information and ideas at a complex level, plus the evaluation and extension of the individual's professional skills.

It applies to individuals who need to maintain a current and comprehensive knowledge of global design trends to inform their own professional practice. Although predominantly for designers, this unit may also be relevant to those who work in related management, marketing and production areas.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Design – Design Process

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Research design trends	1.1 Analyse and select formal and informal research strategies to source information on global design trends 1.2 Identify and explore new and alternative sources 1.3 Evaluate the credibility of information gathered and ensure research scope is sufficiently broad

ELEMENT	PERFORMANCE CRITERIA
2 Analyse design trends to inform own practice	2.1 Use information to challenge and extend own perspectives and ways of thinking 2.2 Examine and assess implications and consequences of design trends on own work 2.3 Use critical analysis to identify creative or commercial opportunities presented by emerging trends and technologies 2.4 Develop systems to identify and respond to future opportunities
3 Develop and articulate positions and ideas	3.1 Develop substantiated positions and ideas on global design trends 3.2 Generate informed discussion, debate and critical analysis with peers and colleagues 3.3 Use debate and feedback to challenge and refine own positions
4 Extend own design skills	4.1 Proactively identify and use opportunities presented by research to extend own design skills 4.2 Re-evaluate and refine approaches to work in the context of current and emerging trends 4.3 Use practice, discussion and ongoing evaluation to continuously improve skills

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

BSBDIV801 Conduct strategic diversity workforce planning

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to conduct high level strategic diversity workforce planning for an organisation. This includes developing objectives and strategies, implementing initiatives and monitoring and evaluating trends and processes. It focuses on making provision for inclusivity to ensure that training, employment and promotional opportunities are provided to all cohorts of the Australian population in an attempt to actively leverage diversity in the workplace.

This unit also covers the research associated with labour markets, labour market programs and the requirement to match organisational needs with employee skills and knowledge.

It applies to individuals who assess factors that may affect the supply of workers; align workforce objectives with business plans; and design strategies and succession plans to ensure a competent and appropriately diverse workforce is available to meet anticipated changes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

BSBFIM801 Manage financial resources

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to manage financial resources in a complex environment for a substantial business unit or organisation.

Leaders are typically required to forecast future financial resource needs, analyse current asset performance and capacity to a standard expected in a commercial environment, and to set business targets. There is a requirement to manage compliance mechanisms, to manage financial risk within agreed plans and mechanisms, and to monitor compliance with financial projections.

It applies to the management of financial resources relating to complex and diverse operations or projects and is an important aspect of work for managers or leaders.

It may relate equally to small-scale activities within a small to medium-sized organisation or a significant activity in a large organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

BSBINN201 Contribute to workplace innovation

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to make a pro-active and positive contribution to workplace innovation.

It applies to individuals working in any industry or community context, in both small and large organisations who take a pro-active approach to identifying, suggesting and developing ideas about better ways of doing things at a practical operational level in a specific area of activity. While the individual's overall work is undertaken with some supervision and guidance, they apply discretion, judgement and effective interpersonal skills in order to contribute to workplace innovation.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Assessment Requirements for BSBINN201 Contribute to workplace innovation

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify ideas for improvements and use information from a range of sources including other people to review and select ideas to put forward for implementation
- communicate the ideas and seek input from others in order to identify how the ideas could be implemented
- implement routine changes within scope of responsibility.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the role of individuals in suggesting and making improvements and the importance of pro-active involvement
- list the positive impacts and the challenges of change and innovation
- provide examples of the types of changes that can occur as a result of effective individual participation within own scope of responsibility
- give examples of the types of changes that are within and outside own scope of responsibility
- list typical reasons why suggested improvements or innovations may not be implemented, including operational and management constraints
- explain how to prepare and communicate ideas for improvement to maximise likelihood of support.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the creativity and innovation and include access to:

- workplace documents
- case studies and, where possible, real situations
- office equipment and resources
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.
