Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- interpret a range of export documentation to determine export Free-on-Board (FOB) value as required for goods exported from Australia
- accurately document export FOB calculations and advice as required by client.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the importance of the International Commercial Terms to international trade
- explain the differences in definitions of FOB values
- identify legislation, codes of practice or standards relevant to exporting of goods
- explain relevant organisational policies and procedures relating to exporting
- explain the penalties that apply to goods where the export FOB value is incorrect.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the business development – international business field of work and include access to:

- office equipment and resources
- relevant workplace documents
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

Assessment Requirements for BSBIPR501 Manage intellectual property to protect and grow business

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify and analyse information and advice from a range of sources to determine
 - legislation, regulations and organisational policies and procedures relevant to intellectual property (IP)
 - organisation's assets, their value and where they are created or procured
 - IP from other people or organisations that is used by the business
 - organisation's IP rights and options for protection
 - costs, benefits and risks of protecting IP
 - potential for business growth through organisation's IP
- review or develop organisational strategy, policies and procedures for protection, management and use of IP including
 - recordkeeping
 - ensuring employees, partners and contractors protect IP
 - identifying and responding to infringements
 - promoting a culture of compliance and respect for the intellectual property rights
- review and evaluate strategies, policies and procedures for IP and make adjustments and improvements as appropriate
- manage and contribute to the development and implementation of commercialisation of organisation's IP.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe types of intellectual property as they relate to the organisation

- explain processes for identifying and valuing the organisation's IP
- give examples of options for commercialisation of IP
- outline typical barriers to implementing policy and procedures to manage IP and possible strategies to address them
- identify relevant legislation and regulations relating to the organisation's intellectual property rights and responsibilities
- outline internal and external sources of information and advice relevant to intellectual property.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the regulation, licensing and risk – intellectual property field of work and include access to:

- relevant legislation, standards and codes
- workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBITA401 Design databases

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to design and develop a database (including queries, forms and reports) to meet a defined need using existing data.

It applies to individuals who may work independently or within an administrative support role, with the responsibility to use databases to store and retrieve data using commercially available database software.

No licensing, legislation or certification requirements apply to this unit at the time of publication.

Unit Sector

Information and Communications Technology – IT Analysis and Design

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Design database	1.1 Review organisational and task requirements to confirm scope and functionality of database design, including data redundancy 1.2 Develop a logical data model to identify and classify data into types 1.3 Select appropriate software according to organisational and task requirements and required scope and functionality of database 1.4 Confirm database design with appropriate person

ELEMENT	PERFORMANCE CRITERIA
2. Develop database	<p>2.1 Set field attributes according to data type and link databases by a common field in accordance with software procedures</p> <p>2.2 Identify primary key to uniquely identify data</p> <p>2.3 Identify foreign keys to establish associations between data</p> <p>2.4 Use software functions and formulae to meet organisational and task requirements</p> <p>2.5 Create password and access system according to organisational and task requirements</p>
3. Develop queries, forms and reports	<p>3.1 Develop queries as required by organisational and task requirements</p> <p>3.2 Develop input screens or forms to access required data</p> <p>3.3 Develop reports according to organisational and task requirements</p>
4. Test and finalise database	<p>4.1 Populate database with sample dataset for testing</p> <p>4.2 Assess and document effectiveness of data relationships, query forms and reports</p> <p>4.3 Address any errors in database design</p> <p>4.4 Name and store database in accordance with organisational requirements and exit the application without data loss or damage</p> <p>4.5 Confirm database readiness with appropriate person</p>

BSBITA601 Configure and optimise customer contact technology

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to establish optimal functionality and efficiency from technologies by configuring them to best suit operational needs.

It applies to individuals working at a managerial or specialist level and within a customer contact environment where complex technology is employed and where the configuring of this technology is undertaken on an ongoing basis to maximise efficiencies and benefits to the organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Information and Communications Technology – IT Analysis and Design

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Analyse current capability of customer contact technology	1.1 Clearly specify the role of customer contact technology in customer contact operations 1.2 Recognise the scope of the functions supplied by the technology 1.3 Accurately align the capabilities of the technology to current and potential operational needs

ELEMENT	PERFORMANCE CRITERIA
2. Benchmark competing new technology applications	2.1 Identify specific operational needs that can be met by technology 2.2 Identify the range of functions and capabilities supplied by benchmarking competing technologies 2.3 Select critical features of competing technologies for analysis 2.4 Conduct an analysis of technologies using cost effective processes 2.5 Select or report on appropriate new technology by considering the analysis of critical features
3. Develop a customer contact system configuration	3.1 Identify and analyse business model to be facilitated by technology 3.2 Identify the required technology components 3.3 Identify all specific contact pathways to be managed by technology 3.4 Arrange configuration of technology to satisfy the business model and contact pathways 3.5 Develop comprehensive testing program to ensure delivery and reliability of new configuration 3.6 Evaluate configuration against business model dimensions
4. Develop a strategy to optimise current technology	4.1 Identify unused capacity in existing technology 4.2 Identify applications for unused capacity appropriate to operational or business model 4.3 Develop a strategy for exploiting additional capacity 4.4 Assess the cost and efficiency of the strategy against available resources and budget 4.5 Recommend a course of action in accordance with the assessment

Foundation Skills

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- complete the analysis, benchmarking and configuration of customer contact technology
- develop and recommend an optimisation strategy for current technology
- manage effective written and verbal communication.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the relevant benchmarking principles
- describe the budgeting and cost benefit analysis principles
- describe the business case preparation principles
- identify business objectives and goals
- describe the following customer contact technologies:
 - communications technologies
 - automatic call distributor (ACD) systems
 - interactive voice response (IVR) systems and databases
 - computer telephony integration (CTI) systems
 - prescriptive dialling, computer-based customer relationship management (CRM) systems
 - information management systems
- identify the needs of internal and external customers that must be considered when evaluating available customer contact technology
- outline sections of the operational budget and business plan relevant to customer contact technology implementation.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the information and communications technology – IT analysis and design field of work and include access to:

- workplace information, reporting and data
- stakeholder feedback
- case studies or, where possible, real situations.

BSBITB501 Establish and maintain a workgroup computer network

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to establish a workgroup computer network with an information technology consultant and to manage the network by keeping records, responding to problems, assisting users and providing training.

It applies to individuals employed in a range of work environments who are required to apply broad knowledge of computer networks; they may be responsible for installing and maintaining the network, but they will work closely with computer professionals in all aspects of this process. In doing so, they may provide administrative support within an enterprise, or may have been delegated these responsibilities for their workgroup or organisation.

No licensing, legislation or certification requirements apply to this unit at the time of publication.

Unit Sector

Information and Communications Technology – IT Building and Implementation

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Manage establishment of a workgroup network	1.1 Determine current and anticipated future network requirements with nominated person in accordance with organisational policy and budgetary constraints 1.2 Ensure selected network is compatible with current

ELEMENT	PERFORMANCE CRITERIA
	<p>organisational software, hardware and work practices</p> <p>1.3 Obtain and install equipment in accordance with organisational requirements and manufacturers' instructions</p> <p>1.4 Install software in accordance with organisational requirements and the manufacturers' instructions</p> <p>1.5 Ensure establishment of network promotes efficiency and access for users</p>
2. Manage maintenance of a workgroup network	<p>2.1 Establish and maintain records to ensure control and security of hardware and software stock, in accordance with organisational policy and procedures</p> <p>2.2 Respond to network problems and rectify minor faults in accordance with organisational requirements</p> <p>2.3 Report major problems and consult computer experts in accordance with organisational policy and procedures</p> <p>2.4 File and store software in accordance with organisational procedures</p> <p>2.5 Recommend improvements for the network to appropriate personnel</p>
3. Assist and train network users	<p>3.1 Provide training for staff to use the network in accordance with needs</p> <p>3.2 Assist network users to maximise network potential</p> <p>3.3 Examine user skills and provide access to appropriate training to improve individual and workgroup efficiency of network use</p>

BSBITB801 Implement advanced electronic technologies

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to improve business, learning and knowledge outcomes through implementing advanced electronic technologies.

It applies to individuals in senior management roles working to ensure learning advances individual and organisational capabilities. Individuals who provide learning should be able to make complex judgements and implement advanced electronic technologies such as those associated with electronic business (e-business) models; electronic retail (e-retail) sales, service and payment solutions; mobile and wireless technologies; and technologies relating to the management of the supply chain.

No licensing, legislation or certification requirements apply to this unit at the time of publication.

Unit Sector

Information and Communications Technology – IT Building and Implementation

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Implement electronic technologies to advance business models	1.1 Determine and communicate to stakeholders the commercial set up of the business to supply electronic commerce (e-commerce) products or services 1.2 Analyse and evaluate e-business models appropriate to a specific operational context

ELEMENT	PERFORMANCE CRITERIA
	<p>1.3 Implement arrangements for conducting e-commerce appropriate to data management, and business and organisational requirements</p> <p>1.4 Ensure e-business models interoperate technically and operationally with organisation's management of customer service, performance, learning and decision support</p> <p>1.5 Implement customer authentication and transaction systems appropriate to business and organisational requirements</p> <p>1.6 Review and report opportunities to improve e-commerce infrastructure, systems and solutions</p>
2. Implement electronic technologies to advance retail sales operations	<p>2.1 Determine and communicate to stakeholders the commercial set up of the business to supply e-retail services</p> <p>2.2 Analyse and evaluate appropriate e-retail tools and processes</p> <p>2.3 Align e-retail strategy with business strategies, and business and organisational requirements</p> <p>2.4 Implement arrangements for conducting e-retailing appropriate to business and organisational requirements</p> <p>2.5 Review and report opportunities to improve e-retail infrastructure, systems and solutions</p>
3. Implement electronic technologies to advance mobile operations	<p>3.1 Identify and communicate to stakeholders, range of options available in mobile computing devices and mobile technologies appropriate to business unit and organisational requirements</p> <p>3.2 Confirm trends in mobile commerce and related systems</p> <p>3.3 Research trends in mobile internet and other communication networks</p> <p>3.4 Implement arrangements for mobile commerce and related systems appropriate to business and organisational requirements</p> <p>3.5 Review and report opportunities to improve mobile electronic infrastructure, systems and solutions</p>
4. Implement electronic technologies to advance supply chain management	<p>4.1 Determine and communicate to stakeholders the commercial set up of the business to electronically manage a supply chain</p> <p>4.2 Research and report strengths and weaknesses of options relating to electronic enhancement of supply chain management</p> <p>4.3 Develop electronic supply chain model and strategy</p> <p>4.4 Align supply chain management with e-business strategies and model</p> <p>4.5 Implement electronic supply chain model</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>4.6 Review and evaluate electronic supply chain model against business and organisational requirements</p> <p>4.7 Determine and report enhancements to electronic enablement of supply chain</p>

Foundation Skills

Assessment Requirements for BSBITB801 Implement advanced electronic technologies

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- research and evaluate appropriate electronic technology for a given business system
- analyse, develop and implement plans for an effective e-business solution, e-retail solution, mobile business solution and electronic supply chain management solution to meet specific organisational needs.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe trends in e-commerce and e-business systems
- outline business policies and procedures impacting job role or function
- identify relevant legislation, codes and standards relevant to the implementation of electronic technologies, including any obligations under the Australian Quality Training Framework (AQFT) Standards
- explain the effects of infrastructure on implementation of electronic technologies
- outline the technologies for implementing secure electronic payments
- explain methods for assuring safe and secure payment using electronic media
- explain current computing devices and technologies for mobile commerce
- explain principles of supply chain management.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the information and communications technology – IT building and implementation field of work and include access to required assessment facilities and resources.

Assessors must satisfy NVR/AQTF assessor requirements.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Use safe work practices	1.1 Adjust workspace, furniture and equipment to suit user ergonomic requirements 1.2 Ensure work meets organisational and work health and safety (WHS) requirements for computer operation
2. Identify and develop keyboard skills	2.1 Identify and apply keyboard functions for both alpha and numeric keyboard functions 2.2 Apply touch typing technique to complete a task 2.3 Develop speed and accuracy in accordance with workplace

ELEMENT	PERFORMANCE CRITERIA
	requirements for level of responsibility
3. Check accuracy	3.1 Proofread document carefully to identify errors 3.2 Amend document, correct errors and complete a final accuracy check

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	2.3, 3.1, 3.2	<ul style="list-style-type: none"> Comprehends textual information in workplace documents to confirm work requirements Checks own work to identify errors
Writing	2.2, 2.3, 3.2	<ul style="list-style-type: none"> Enters and edits numerical and textual information according to a defined format
Navigate the world of work	1.1, 1.2, 2.3	<ul style="list-style-type: none"> Complies with organisational and legislative requirements and meets expectations associated with own role
Get the work done	2.1-2.3, 3.1, 3.2	<ul style="list-style-type: none"> Understands the specific functions and features of digital tools and uses these to perform work tasks

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Speed and accuracy must be:	<ul style="list-style-type: none"> consistent with degree of experience of operator relevant to level of responsibility.

Assessment Requirements for BSBITU203 Communicate electronically

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- follow organisational and service provider requirements when communicating electronically
- follow organisational policy and procedures when managing all aspects of electronic communication
- comply with netiquette
- collaborate in accordance with agreed parameters for electronic communication
- identify most appropriate software applications.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify different methods of electronic communication
- outline key provisions of relevant legislation that affect aspects of business operations
- outline relevant organisation policies and procedures.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the information and communications technology – IT use field of work and include access to:

- organisational policies and procedures
- relevant legislation
- relevant workplace documentation and resources
- industry software packages.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBITU301 Create and use databases

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to create simple two-table relational databases with reports and queries, for storage and retrieval of information.

It applies to individuals that may provide administrative support within an enterprise, or may be independently responsible for storage and retrieval of data relating to their own work roles.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Information and communications Technology – IT use

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Create a simple database	1.1 Design a simple database, with at least two tables, using a database application, basic design principles, software functions and simple formulae 1.2 Develop a table with fields and attributes according to database usage, as well as data considerations and user requirements 1.3 Create a primary key for each table 1.4 Modify table layout and field attributes as required

ELEMENT	PERFORMANCE CRITERIA
	1.5 Create a relationship between the two tables 1.6 Check and amend data entered, in accordance with organisational and task requirements
2. Create reports and queries	2.1 Determine information output, database tables to be used and report layout to meet task requirements 2.2 Determine data groupings, search and sort criteria to meet task requirements 2.3 Run reports and queries to check results and formulae provide the required data 2.4 Modify reports to include or exclude additional requirements
3. Use database	3.1 Ensure data input meets designated timelines and organisational requirements for speed and accuracy 3.2 Use manuals, user documentation and online help to overcome problems with database design and production 3.3 Preview, adjust and print database reports or forms in accordance with organisational and task requirements 3.4 Name and store databases, in accordance with organisational requirements, and exit application without data loss or damage 3.5 Prepare and distribute reports to appropriate person in a suitable format

Select and prepare resources	1.1 Select and use appropriate technology and software applications to produce required business documents 1.2 Select layout and style of publication according to information and organisational requirements 1.3 Ensure document design is consistent with company and/or client requirements, using basic design principles

ELEMENT	PERFORMANCE CRITERIA
	1.4 Discuss and clarify format and style with person requesting document/publication
2. Design document	2.1 Identify, open and generate files and records according to task and organisational requirements 2.2 Design document to ensure efficient entry of information and to maximise presentation and appearance of information 2.3 Use a range of functions to ensure consistency of design and layout 2.4 Operate input devices within designated requirements
3. Produce document	3.1 Complete document production within designated timelines according to organisational requirements 3.2 Check document produced to ensure it meets task requirements for style and layout 3.3 Store document appropriately and save document to avoid loss of data 3.4 Use manuals, training booklets and/or help-desks to overcome basic difficulties with document design and production
4. Finalise document	4.1 Proofread document for readability, accuracy and consistency of language, style and layout prior to final output 4.2 Make any modifications to document to meet requirements 4.3 Name and store document in accordance with organisational requirements and exit application without data loss/damage 4.4 Print and present document according to requirements

Assessment Requirements for BSBITU306 Design and produce business documents

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- select appropriate technology and software for design and production of business documents
- adhere to organisational requirements when:
 - selecting layout and style
 - opening and generating files
 - producing documents within designated timelines
 - naming and storing documents
 - printing and presenting documents
- adhere to task requirements when producing documents including:
 - applying basic design principles
 - applying consistent formatting
 - using appropriate styles
 - using correct layouts
 - proofreading as required
- use appropriate data storage options
- apply knowledge of functions and features of contemporary computer applications
- print and present completed documents.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify appropriate technology for production requirements

- describe functions and features of contemporary computer applications
- outline organisational policies, plans and procedures
- list organisational requirements for document design e.g. style guide.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the information and communications technology – IT use field of work and include access to:

- office equipment and resources
- relevant software applications
- examples of style guides
- organisational procedures.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBITU307 Develop keyboarding speed and accuracy

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to develop keyboard skills with speed and accuracy using touch-typing techniques.

It applies to individuals who work in a range of environments and are required to enter text and data with speed and accuracy. They may work as individuals who provide administrative support within an enterprise, or may be technical/knowledge experts responsible for production of their own word processed documents.

On successful completion of this unit, individuals must be assessed in accordance with the current version of AS 2708: 2001 and issued with a speed statement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Information and Communications Technology – IT Use

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Use safe work practices	1.1 Adjust workspace, furniture and equipment to suit ergonomic requirements 1.2 Ensure work meets organisational and work health and safety

ELEMENT	PERFORMANCE CRITERIA
	(WHS) requirements for computer operation
2. Identify and develop keyboard skills	2.1 Identify and apply keyboard functions for both alpha and numeric strokes 2.2 Apply touch-typing technique to complete tasks 2.3 Develop speed and accuracy in accordance with workplace requirements for level of responsibility
3. Check accuracy	3.1 Proofread document carefully to identify errors 3.2 Amend document, correct errors and complete a final accuracy check

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description

BSBLED503 Maintain and enhance professional practice

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required by individuals to manage their own professional development and ongoing performance.

This unit addresses the process required to maintain a high level of professional performance in a particular field. It includes modelling high standards of performance according to professional standards and procedures, and the processes and outcomes involved in determining professional development needs and participating in associated activities.

It applies to individuals who are required to maintain and manage their professional development at a high standard. Its application in the workplace will be determined by the job role of the individual and the legislation, rules, regulations and codes of practice relevant to different jurisdictions.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- research and evaluate models and approaches to organisational learning to support strategic requirements
- examine and review organisational policies and procedures relevant to training and assessment
- develop consultation and communication processes to support and encourage personnel input into design, implementation and review of organisational learning strategy including:
 - planning technological and systems requirements
 - creating in-built flexibility for change in organisational priorities
 - implementing appropriate processes
- initiate and implement learning program partnerships in line with relevant regulatory, employment and organisational requirements
- source learning resources or assessment tools, and modify if required, to meet requirements of organisational learning strategies
- implement plans for improving organisational learning strategies.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain authoritative responsibilities and parameters within the organisation
- describe consultation and communication processes to support and encourage organisational input into policy and procedure development processes
- list contemporary approaches to assessment instrument and strategy design
- describe contemporary organisational learning strategy design and development

- outline continuous improvement processes associated with organisational learning strategy
- explain implementation processes and their impact on an organisation
- identify locations, types and sources of relevant organisational documentation
- list organisational evaluation strategies
- identify organisational learning theory
- describe quality management compliance requirements as it relates to organisational learning
- outline a range of international e-learning compliance regimes
- list relevant authority compliance requirements and obligations, for example under the Australian Quality Training Framework (AQTF) and Standards for Registered Training Organisations (where applicable)
- identify legislation, codes of practice and national standards relevant to job role
- outline technology and systems requirements to support an organisational learning strategy.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the workforce learning and development field of work and include access to:

- organisational policies and procedures
- office equipment and resources
- business technology
- case studies and, where available, real situations
- interaction with others
- information on current training and assessment requirements.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBLED803 Implement improved learning practice

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to initiate and implement advanced learning practice that supports improvement of learning strategies in an organisational context.

The unit also covers evaluating ways to improve learning practice, managing and monitoring means to improve learning, and analysing and advancing adoption of improved learning practice.

It applies to leaders or individuals who use learning to build organisational capabilities. It focuses on using research, theoretical analysis and professional investigation to identify ways of improving learning practice and implementing appropriate pedagogy.

Methods for improving learning practice include developing individual staff members from the perspective of the organisation's needs and imperatives, and enhancing outcomes for learners and candidates.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for BSBLED804 Review enterprise e-learning systems and solutions implementation

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- improve organisational capabilities by implementing advanced e-learning solutions
- identify and research trends in e-learning
- determine organisation's learning requirements and create policy and procedures to support design or selection of e-learning resources to meet the organisation's requirements
- identify and report risks associated with e-learning implementation
- test, review and adjust e-learning resources and systems as required
- collaboratively research e-learning opportunities, constraints and improvements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain how to create an effective learning experience using electronic technology
- describe a range of e-learning environments and their application in designing e-learning resources
- describe instructional design principles for electronic materials
- explain the considerations in devising an e-learning and assessment strategy
- describe methods for system testing and evaluation
- explain how international e-learning regimes and organisational policies and procedures impact on e-learning in the workplace
- list relevant policy, legislation, codes of practice and national standards, including AQTF Standards for Registered Training Organisations (if applicable).
-

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the workforce learning and development field of work and include access to:

- information on current trends in e-learning and instructional design principles
- office equipment and resources
- case studies and, where available, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBLED805 Plan and implement a mentoring program

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to develop and implement a mentoring program for a particular section or group within an educational organisation, or for a specific business purpose or objective within an enterprise whose core business is not education, or as a collaborative partnership spanning more than one organisation (such as to advance occupational or industry-specific skill needs).

It applies to individuals who plan, develop, implement, monitor and evaluate a mentoring program that results in learning forged through a defined and active learning partnership with a mentor. The program should develop and use tools that enhance both the learning and the phased relationship, and it should be monitored and evaluated to ensure it explores and meets the mentee's learning needs.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

BSBLED806 Plan and implement a coaching strategy

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to plan and develop a coaching strategy and to monitor implementation of the coaching program within an organisational context. A coaching strategy may be:

- an internal program forming part of the professional development activities of an educational organisation (such as a Registered Training Organisation) or an enterprise whose core business is not education
- developed for an external client, for example as part of the range of learning services offered or conducted in a collaborative partnership with more than one organisation.

It applies to individuals working to ensure learning advances individual and organisational capabilities. Leaders in learning are typically required to develop and implement coaching strategies in a systematic manner, and to monitor, review and improve strategies to optimise learning outcomes for individuals and the organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

BSBMGT403 Implement continuous improvement

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to implement the organisation's continuous improvement systems and processes. It covers using systems and strategies to actively encourage the team to participate in the process, monitoring and reviewing performance, and identifying opportunities for further improvements.

It applies to managers who have an active role in implementing the continuous improvement process to achieve the organisation's objectives. Their position is closely associated with the creation and delivery of products and services which means that they have an important role in influencing the ongoing development of the organisation.

At this level, work will normally be carried out within routine and non-routine methods and procedures, which require planning, evaluation, leadership and guidance of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

BSBMGT404 Lead and facilitate off-site staff

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to supervise staff who perform agreed duties at an alternative site (usually home) during some or all of the scheduled work hours. Off-site work is a flexible employment option that meets all legal and regulatory employment requirements.

It applies to individuals who may be supervisors or team leaders and have responsibility for overseeing the work of off-site staff.

Increasingly, managers and staff are at different locations and the opportunities for face to face communication are reduced. In these cases, individuals must develop different techniques and approaches to ensure quality standards and work outcomes are met.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

BSBMKG409 Design direct response offers

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to design, implement and evaluate direct response offers which match organisational business and marketing objectives and resolve marketing problems.

It applies to individuals working in a marketing assistant or account manager role who are required to design direct marketing offers for products or services. Such individuals may work in small, medium or large enterprises across a variety of industries; they usually work with a team and customers to design offers.

Direct response offers include payment related promises such as offers in relation to exchanging goods and services for money; terms of payment; performance and quality guarantees; delivery method; and time, place and method of order placement. Offers may also be made that do not involve payment matters, such as the offer of a free brochure or catalogue in return for providing a name and address.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

BSBMKG520 Manage compliance within the marketing legislative framework

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to comply with the legislative structure of the marketing industry and use this for competitive advantage.

It applies to individuals who work across a variety of industries and who possess a sound theoretical knowledge base, and demonstrate a range of managerial skills to ensure business activities are conducted legally and effectively.

A sound working knowledge of the legal environment in which marketing decisions are made is essential to protect a business from litigation, and individuals in these roles must competently discuss legal issues with specialists, but do not make legal decisions independently.

An in-depth understanding of the legislative operating environment also informs the development of marketing strategies.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Evidence of the ability to:

- create a project schedule showing tasks, deliverable milestones, sequence, dependencies and time estimates
- apply time-management techniques in a project
- use tools and techniques to maintain, monitor and update a project schedule.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain implications of time management for project resources, costs and risks
- describe methods for estimating task duration and resource requirements
- identify tools and techniques for managing project time and their particular applications
- explain techniques used to measure, record and report progress of activities.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – project management field of work and include access to:

- workplace documentation relevant to project management
- planning tools
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

Assessment Requirements for BSBPMG416 Apply project procurement procedures

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- document procurement requirements for a workplace project, including clear descriptions of product and service, quality specifications, resource identification, supply and delivery requirements and supply and engagement metrics
- apply procurement-management procedures to a workplace project, including selection criteria, testing and accepting, monitoring and receiving supplies
- finalise procurement agreements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and describe procurement-management policy, processes and procedures
- explain the procurement documentation requirements
- describe the components of contractual documentation and the legal obligations of all parties
- explain the process used to select preferred contractors
- identify and describe project procurement-management tools and techniques.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – project management field of work and include access to:

- examples of project procurement documentation
- examples of procurement tasks and activities

- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

Assessment Requirements for BSBPMG514 Manage project cost

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- work closely with others to determine resources against budgetary frameworks
- prepare a budget and cost-management plan for a project
- monitor costs across a project's life cycle including solving cost variations and analysing possible alternatives
- record expenditure, create accurate financial reports and review cost-management processes.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain appropriate budgeting processes, tools and techniques
- describe methods and tools for costing and cost analysis
- explain strategies for managing costs and their application in different situations
- outline processes for reviewing costs against outcomes
- summarise key organisational policies and procedures applicable to this role.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – project management field of work and include access to:

- workplace documentation, including budgets and other financial documents
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- devise and implement a governance plan, with an appropriate project management structure for a project of sufficient complexity to demonstrate the full range of performance requirements
- demonstrate effective team leadership within context of project governance
- monitor and evaluate a project governance structure.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain escalation and issues management models
- describe frameworks for authority delegations
- identify and analyse organisation or industry governance models in context of the project
- describe project governance plans
- explain methods to moderate and solve conflicts in context of project management.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Project Management field of work and include access to:

- examples of project governance documentation
- records of governance implementation in stakeholder and team activities.

Assessors must satisfy NVR/AQTF assessor requirements.

 - making project-authorisation recommendations
- define and plan program scope, including:
 - defining and confirming project- and program-level objectives, major deliverables and resource requirements
 - determining and agreeing measurable outcomes and benefits to enable program performance evaluation
 - developing, agreeing on and communicating scope definition, scope management strategies and plans
 - aligning scope to business requirements and organisational strategy
- manage program scope, including:
 - conducting regular program reviews
 - establishing and maintaining a change management system
 - conducting reviews of scope changes
 - measuring project outcomes
 - communicating results of program outcomes
 - passing on scope management lessons learnt.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe a broad range of scope management plans, methodologies, techniques and tools
- outline project life cycle and significance of scope management
- identify typical challenges and issues encountered in project scope management and options for addressing these.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – project management field of work and include access to:

- workplace documentation, including feedback from stakeholders, which reflects how scope was managed
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBPMG603 Direct time management of a project program

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to direct time management across projects so that key deliverables meet project and program schedules.

It applies to individuals who are program managers, managing a suite of projects (a program).

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Direct project schedule development	<p>1.1 Determine from individual project plans the duration, effort, sequence and interdependencies of major activities and milestones to form the basis of the program schedule</p> <p>1.2 Direct project managers, through use of time management methods, techniques and tools, preferred schedules, time management plans, resource allocation and financial requirements, to enable continuous updating and refining of the program schedule</p> <p>1.3 Formalise and communicate project schedules to stakeholders, with agreement, as basis for planning, implementation and review</p>

ELEMENT	PERFORMANCE CRITERIA
	of progress
2. Manage program schedules	<p>2.1 Develop, implement and modify mechanisms to monitor, control, record and report actual progress in relation to agreed schedule and plans</p> <p>2.2 Conduct ongoing analysis to identify and forecast variances and trends, and to develop responses, so projects meet their schedules</p> <p>2.3 Manage durations of key activities and interdependencies between projects to enable financial and resource rationalisation across the program, to meet strategic expectations within the management/reporting period of the program</p> <p>2.4 Review progress and refine schedules throughout the program life cycle to ensure consistency with changing scope, objectives and constraints related to time and resource availability</p> <p>2.5 Ensure responses to perceived, potential or actual project schedule changes are authorised, to achieve program objectives</p>
3. Analyse time management outcomes	<p>3.1 Review and analyse multiple project and program outcomes from available records and information to determine effectiveness of the schedule and time-management processes</p> <p>3.2 Pass on lessons learnt to higher project authority and provide feedback for application, planning and implementation of later projects within the program</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

BSBPMG604 Direct cost management of a project program

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to analyse, coordinate, and refine budgets of multiple projects contributing to an overall program budget. It covers directing project budget development, managing program costs and directing financial completion of projects.

It applies to individuals who are program managers, managing a suite of projects (a program).

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Direct project budget development	1.1 Direct project managers to determine resource requirements for individual tasks, in consultation with appropriate stakeholders, to develop project budgets which contribute to the program budget 1.2 Direct project cost estimations to enable budgets and cost management processes to be developed for project life cycles 1.3 Direct and authorise cost strategies and cost management plans to ensure clarity of understanding and ongoing management of project finances and the program budget

ELEMENT	PERFORMANCE CRITERIA
2. Manage program costs	<p>2.1 Develop and maintain cost management systems to direct monitoring of actual expenditure and to control costs throughout multiple project life cycles and for the program</p> <p>2.2 Conduct analysis, evaluate options and implement responses to project cost variations to maintain control over changing financial and program objectives</p> <p>2.3 Monitor internal and external influences on program costs and, where necessary, seek approval from business management for changes to the approved program budget</p>
3. Direct financial completion	<p>3.1 Provide direction for project finalisation activities to achieve integrated financial and physical project completion within program expectations</p> <p>3.2 Review project outcomes from available records at the finalisation of each project, and analyse information to determine effectiveness of cost management systems</p> <p>3.3 File program lessons learnt as a resource for future reference and, where necessary, refer to higher project authority for application in planning strategic direction changes and business outcomes for future projects</p>

BSBPMG607 Direct communications management of a project program

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to provide the critical link between people, ideas and information at all stages in the life cycles of multiple projects across a program. It covers directing project communications and information management, managing program communications, and analysing communications management outcomes for projects and programs.

It applies to individuals who are program managers, managing a suite of projects (a program).

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Direct planning of project communications	1.1 Direct project information requirements, in consultation with appropriate stakeholders, as basis for projects and program communications planning 1.2 Direct communications management plans and activities to ensure clarity of understanding and achievement of multiple project objectives at all levels

ELEMENT	PERFORMANCE CRITERIA
	1.3 Develop project management information system (PMIS), structure and procedures to maintain quality, validity, timeliness and integrity of information and communication across the program and in regard to organisational strategic management
2. Direct management of project information	<p>2.1 Direct generation, gathering, storage, retrieval, analysis and dissemination of information by project staff and stakeholders to improve decision-making processes and communications across the program and between projects</p> <p>2.2 Direct information validation processes for development, management and modification to ensure consistent quality and accuracy of data across the program</p>
3. Manage program communications	<p>3.1 Develop and manage formal and informal communication networks between the organisation's management structure, program, projects and key stakeholders to ensure effectiveness throughout multiple life cycles of projects within the program</p> <p>3.2 Address potential, perceived and actual problems with communication and management information systems through project managers, and ensure remedial actions are authorised, to ensure project, program and organisational objectives are met</p> <p>3.3 Manage customer relationships beyond delegated responsibility of project managers, to ensure clarity of understanding of objectives and to minimise conflict across the program</p>
4. Analyse communications management outcomes	<p>4.1 Direct project finalisation activities to ensure ownership of, and responsibility for, information outcomes</p> <p>4.2 Review and analyse project outcomes to determine effectiveness of management information and communications systems</p> <p>4.3 Aggregate and use lessons learnt across multiple projects for other program and organisational applications</p>

 - developing project management information system (PMIS), structure and procedures
- direct management of project information, including:
 - directing generation, gathering, storage, retrieval, analysis and dissemination of information
 - directing information validation processes
- manage program communications, including:
 - developing and managing formal and informal communication networks
 - addressing potential, perceived and actual problems
 - managing customer relationships
- analyse communications management outcomes, including:
 - directing project finalisation activities
 - reviewing and analysing project outcomes
 - aggregating and using lessons learnt.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe PMIS structures and options

- explain information validation processes and their application to various contexts
- summarise new technologies for communications and their relative strengths and weaknesses.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – project management field of work and include access to:

- workplace documentation
- feedback from project teams and stakeholders as to how communications were managed.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBPMG614 Engage in collaborative alliances

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to enable a program to engage in collaborative alliances. It includes the performance criteria required to demonstrate competency in forging alliances with other organisations to facilitate attainment of program benefits.

Collaborative alliances are significantly different in focus and content from commercial contracts in that the parties operate as partners with shared interests and a higher degree of joint decision-making. However, collaborative alliances are often formalised with the use of a legally binding contract. Collaborative agreements often involve organisations that are part of the same legal entity; business units of the same corporation or departments of the same government.

A program is defined as a set of interrelated projects, each of which has a project manager. 'Multiple projects', or 'a program of projects', refers to a number of related projects managed by the same person as a program to achieve organisational objective/s.

It applies to individuals who are program managers and those managing a suite of projects (a program). They operate within assigned authority levels, are responsible for their own performance and sometimes the performance of others.

Individuals in this role may be operating within an organisation, a business or as a consultant.

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- implement communication and network skills to assist engaging potential collaborators
- demonstrate environment scanning techniques to identify opportunities for collaboration
- conduct negotiations to devise and agree collaboration arrangements
- demonstrate written and literacy skills to document agreements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify methods to maintain and sustain alliances
- compare alternate negotiating strategies
- discuss summary profiles of collaborators
- list types and forms of collaboration agreements
- explain types and forms of collaborative alliances.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – project management field of work and include:

- access to workplace documentation regarding collaborative alliances
- feedback from stakeholders, which reflects how collaborative alliances were managed for a program.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBPMG801 Prioritise projects and programs

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to prioritise projects and programs within a portfolio. It covers the identification, strategic alignment and setting of priorities at the portfolio level.

A portfolio is the centralised management of one or more portfolios of projects, which includes identifying, prioritising, authorising, managing and controlling projects, programs and other related work, to achieve specific strategic business objectives.

It applies to individuals who operate at the strategic level within the organisation. Unlike projects or programs, a portfolio does not have a finite life, instead it is a continuous process and requires regular tending to ensure the portfolio remains in balance and is consistent with the organisation's strategic objectives.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

BSBPMG808 Manage portfolio risk

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to manage the risks within a portfolio. It covers the identification, analysis, monitoring and control of portfolio risks.

A portfolio is the centralised management of one or more portfolios of projects, which includes identifying, prioritising, authorising, managing and controlling projects, programs and other related work, to achieve specific strategic business objectives.

It applies to individuals who operate at the strategic level within the organisation. Unlike projects or programs, a portfolio does not have a finite life, instead it is a continuous process and requires regular tending to ensure the portfolio remains in balance and is consistent with the organisation's strategic objectives.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the organisation's policies and procedures that must be followed when completing the full range of tasks covered
- list relevant information sources and for each source briefly explain:
 - how each source is accessed
 - the type of information
- briefly explain the legislative requirements that apply when researching, accessing and using legal information.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the knowledge management – research field of work and include access to:

- appropriate legislation and regulations relevant to common legal matters
- organisational policies and procedures for formatting of documents, security and confidentiality
- office equipment and resources
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- monitor usage of online business or records system
- monitor application of system procedures
- manage record creation, update, migration and disposal processes.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline key provisions of relevant legislation that apply to a records system
- explain the general principles and processes of records management and records management systems, including, but not limited to;
 - systems of control
 - records continuum theory
 - mandate and ownership of business process
- explain the operation of the online recordkeeping environment including location and nature of transactions.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the knowledge management – recordkeeping field of work and include access to:

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources

- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBRKG502 Manage and monitor business or records systems

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to set up the operational frameworks for the creation, capture and use of records and to monitor and review these frameworks and activities within a business or records system of a specific business domain.

It applies to individuals who work closely with other staff members in an organisation and may also have a degree of individual responsibility and autonomy. They use a range of organisational, analytical and managerial techniques to perform their work in business and records systems or in specialist recordkeeping environments, such as archives.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

BSBRKG505 Document or reconstruct a business or records system

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to document or reconstruct a business or records system and its context.

It applies to individuals who use a range of organisational and analytical techniques to perform their work in archival or general record systems environments. They work closely with other members of an organisation and have individual responsibility for documenting or reconstructing systems.

A business or records system may need to be reconstructed for a variety of reasons, including:

- capturing into archival control systems for access and control purposes
- changes to the system of control including computerisation or migration between systems
- transfer of an organisation's ownership or control arising from amalgamation, takeover or bankruptcy
- administrative change, closure of offices or changes in accommodation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

BSBRKG506 Develop and maintain terminology and classification schemes

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to develop new or modified vocabulary controls and classification schemes for business or records systems based on an organisation's functions and activities.

It applies to individuals who work closely with other staff members throughout an organisation and use a range of investigative, analytical and consultative techniques to perform their work. They may be working in a specialist recordkeeping environment such as archives and their individual responsibilities may include the development and implementation of systems.

Generally, where no formal vocabulary controls exist in an organisation there is a form of controlled titling. This unit covers the formalisation of such informal schemes. Vocabulary control, or controlled language, is commonly called a 'thesaurus' in some sectors of the recordkeeping industry.

No licensing, legislative or certification requirements apply to this unit at the time of publication.
